Information as of 03/31/2019

This fund is only available in the Personal Retirement Planner Deferred Variable Annuity.

Description:

The fund invests mainly in the stocks of medium-size U.S. companies, choosing stocks considered by an advisor to be undervalued. Undervalued stocks are generally those that are out of favor with investors and are trading at prices the advisor feels are below-average in relation to such measures as earnings and book value. These stocks often have above-average dividend yields. The fund tends to invest a high percentage of assets in its ten largest holdings. The fund uses multiple investment advisors. This is an aggressive investment.
